STATEMENT

"The Garden of the Mind" is an installation of large works on tarps and smaller works on panels that creates a world to contemplate our thoughts inside the context of a Garden.

"You can grow ideas In the Garden of your mind"
-Mr. Rodgers.

The pieces in this show exemplify Judd's established use of found objects, collage and mixed media. His work combines a collection of different imagery and material to create a visual poetry. It also reflects a connection to the surrealist art movement; one which explored the workings of the mind, championing the irrational and exploring the unconscious. In this case, the metaphor of the garden as a place to discover nature and our relationship to this primal subject matter.
